

Center for Dark Energy Biosphere Investigations
Global Environmental Microbiology (GEM)
2021 Summer Program

We are recruiting early career undergraduates interested in a STEM career from 2- and 4-year colleges
to join us at the University of Southern California & Santa Catalina Island
from June 13 through July 2, 2021
for lectures, discussions, labs, fieldwork, networking, career panels & more
focusing on aquatic microbes and their ecology
taught by Drs. John Heidelberg and Eric Webb
paid for by C-DEBI, including travel, room, board, and course expenses.

HOWEVER, if we cannot host the program in-person, we will offer a highly modified online version
to join us *online using Zoom, Slack, and other communication methods*
from *June 14* through July 2, 2021
for lectures, discussions, *computer-based* labs, *fieldwork talks*, networking, career panels & more.
Please see website for more details.

Complete the online application form, submit an unofficial transcript, and have a letter of recommendation submitted on your behalf. *Must be at least 18 years old, have taken a college-level science course, & be a U.S. citizen or permanent resident.*

Applications are open now and are due by 5pm Pacific Standard Time on February 25, 2021.
