Hutton Honors Study Abroad
Planetary Health & Global Climate Change in Costa Rica

May 23-June 20, 2022  Final Application Deadline: Jan. 28, 2022

This four-week international field course provides a critical evaluation of key theories in planetary health, including the interactions between human, animal, and environmental health, conservation of biodiversity, environmental policy, and sustainable human systems, with an emphasis on place-based learning. Students will visit a series of sites in Costa Rica, relevant to the current climate crisis, including wind and solar farms, biological field stations in tropical forests, and institutions focused on sustainability.

Attend an Upcoming Information Session
January 18 6:30-7:30pm, HHC Great Room
